## Stick insects

This class have a few stick insects at the back of the room . Stick insects are green and blend in with twigs and leaves . They like to eat brambles and to drink you should squirt water on the leaves.

Stick insects are cool animals and it is good to get them out once or twice a week. If you have stick insects and are bored you could build them and play thing that they can climb around built by lego or blocks

## BEST WORK!!!

Congratulations to Imogen Keyford for her excellent badger report, we think that it's wonderful! This is a little snippet of her work.....

The Badger is sure to stand out with it's striking black and white stripes. It has a stocky body. The male is slightly bigger than the female. It has muscular legs for digging with. Their main diet is worms and eat 100's every night!

## NIGHT CAMERA

With the money they raised on doing their recent assembly they bought a night camera. On the night camera they have seen badgers, a fox and a cat !

## "WHAT WE ARE LEARNING ABOUT AT THE MOMENT"

Topic= Romans. On the 29th of January 2013 year 3 went to the Roman Baths.

Science= Teeth.

They are also doing work on badgers and other animals recorded on the night camera.

Oliver Snook is **Oliver Snook** 3E's school council representative. He has been attending all the meetings and he has told us that he is really enjoying working with the WASPS school council.
