

# 4CH'S PAGE

At the moment 4CH's topic is The Normans ( Battle of Hastings )The **Battle of Hastings** occurred on 14 October 1066 during the Norman period. They have got some great displays in their classroom and they have been telling us how much they enjoy this science subject... After learning about King Arthur, 4CH wrote 4 plays in the class. Each group had a selection from the King Athur story. I had, "When King Athur was born" where Merlin told Arthur's

g to die. So to another gath- great fun. shed our plays, s of apple juice, me cheese. The y" Just like the it all our desks ln't have had look at some of want to see

Louis Pain is one of the many pupils who went to see a pantomime preformed by some of the students from "Bath University" he wrote an excellent review in class. Louis' review was very good. Here is a paragraph from it....

" The character who excited me was a cheeky, but seriously funny pirate named Ben Gunn. After being marooned for 20 years by his captain he had turned to be baloney" I adored his mischievous moustache, It really suited his character. Overall, Ben Gunn gave an energetic performance which entertained the audience. A good Job, Well done!"

In 4CH they are currently learning about solids and liquids in Science. They said to us that they find this area really interesting.

They have got some great displays in their classroom and they have been telling us how much they enjoy this science subject...

Ella Keightley has been speaking to us about a little experiment that she carried out at home "I put 12 items in a pot (including a tamatoe, marmite, saltwater, washing up liquid and leamon juice) and froze them"

Ella said that she left them overnight but when she woke up she got a few shocks!!

"The tamatoe, washing-up liquid and leamon juice froze but surprisingly the marmite didn't."

**Congratulations to Ella for her super experiment!**

## School Council

*What are your main aims in School council this year?* Ollie: We're going to be looking to improve the school.

Joe: The major focuses this year are working towards new events.

*What's good about school council?*

Joe: we all get to speak for ourselves in a small group.

Also Joe and Ollie told us that they are very excited about getting the new building " It will be great getting more space for new children!" Ollie said.
