

Block explicit results on Google using SafeSearch

You can filter explicit search results on Google, like pornography, using the SafeSearch setting. SafeSearch isn't 100% accurate, but it helps you avoid explicit content.

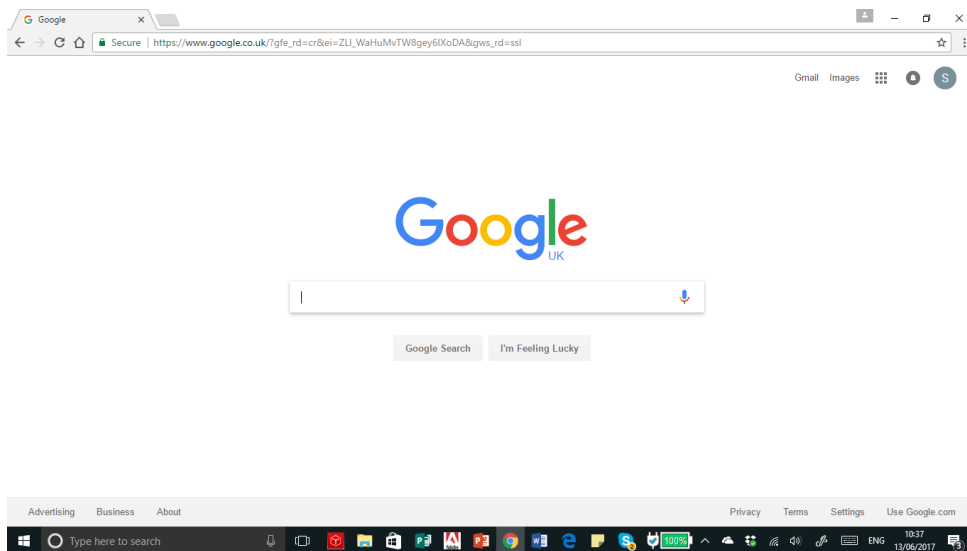

You can use SafeSearch as a parental control to help protect children from inappropriate search results on your phone, tablet, or computer.

How SafeSearch works

When SafeSearch is on, it helps block explicit images, videos, and websites from Google Search results.

When SafeSearch is off, we'll provide the most relevant results for your search and may include explicit content when you search for it.

Turn SafeSearch on or off

1. Go to [Search Settings](#).
2. Under "SafeSearch filters," check or uncheck the box next to "Turn on SafeSearch."
3. At the bottom of the page, select **Save**.

You should then see the coloured balls when you use your search engine
